Java/Python Developer

A technology team within a growing financial firm is seeking a Java/Python developer to help expand existing systems and build new products from the ground up. The firm itself is a top tier financial organization, widely recognized for their innovative technology strategies and initiatives. This is a full-time role located in downtown Chicago.

The team is comprised of developers who show a strong desire and willingness to be challenged and learn about new technologies and domains. The team is looking for a Java/Python developer who is able to hit the ground running in an exciting and fast-paced environment and who can make immediate contributions. The ideal candidate will have experience in server side development with Java, Python and messaging systems such as JMS, MQ, Sonic or Tibco.

Qualification for this position include:

- 5+ years of experience with Python or Java
- 2+ years working with JMS, MQ, SonicMQ or Tibco
- Exposure to Casandra, MongoDB or Hadoop is a plus
- Desire and willingness to be challenged and learn about new technologies as domains
- Familiarity with Linux
- Strong analytical and creative problem solving skills
