

CHSH Opens Big! UP 27.5%

China Shoe Holdings Inc. (CHSH)

\$0.74 UP 27.5%

News is spreading and investors are jumping. Following the announcement of 1000 new retail outlets being opened, heavy trading pushed shares up 27.5%. News expected tomorrow. Trading will be huge. Get on CHSH first thing Tuesday!

It's helped by the fact that the ruby community has formed around the best ideas of the OO and Extreme Programming communities.

I've been hoping for a long time that one of the LAMP technologies would break through into corporate IT, and it looks like Ruby could well do it.

My iconic image was DHH as Neo of the Matrix, breaking the rules of enterprise software and reveling in the success.

NET, MISSISSAUGANEWS.

THE REPRODUCTION, MODIFICATION, DISTRIBUTION, TRANSMISSION OR REPUBLICATION OF ANY MATERIAL FROM MISSISSAUGA.

I've long had a particular fondness for the Ruby community, so I turned up as an attendee at this year's RailsConf.

Success is not just being an outbreak of sanity in the IT world, but actually leading that world.

There isn't the wall between the old farts and the loud teenagers that you often get, instead a real appreciation for what both groups have to offer.

This year my sense is that this morphed into something much more important.

A couple of years ago I wrote about the impressions people had that the RubyPeople were notably more friendly than most software communities.

Technologies that make it harder for programmers to do what they like to do best - make a difference for the businesses they are supporting.

CA IS STRICTLY PROHIBITED WITHOUT THE PRIOR WRITTEN PERMISSION OF METROLAND MEDIA GROUP LTD.

Corporate IT is dominated by bloatware.

Technologies that make it harder for programmers to do what they like to do best - make a difference for the businesses they are supporting.

The important thing is that there's a lot of respect and collaboration across this generation gap.

One of the biggest issues our Ruby teams run into is deployment.

Throughout the conference there was a sense that we are at an inflection-point in our industry, a key technological shift that promotes a new major platform.

Ruby is a community effort.

Our RubyWorks stack tries to simplify this, but JRuby offers the choice of just deploying into a Java container, turning a Rails app into an easily deployed war file.

THE REPRODUCTION, MODIFICATION, DISTRIBUTION, TRANSMISSION OR REPUBLICATION OF ANY MATERIAL FROM MISSISSAUGA.

Chad Fowler and Rich Kilmer introduced the conference.

Time and time again we have to deal with expensive software purchased on golf courses that just get in our way while sucking funds and development hours.

COM, AND BUSINESSTIMES.

I've been hoping for a long time that one of the LAMP technologies would breakthrough into corporate IT, and it looks like Ruby could well do it.

At last year's conference my sense was that of a community delighted and rather stunned by its success.

Our RubyWorks stack tries to simplify this, but JRuby offers the choice of just deploying into a Java container, turning a Rails app into an easily deployed war file.

There seems an excellent chance that Ruby and Rails could become a significant platform for IT development over the next few years.

These ideas have made a great impact on many other technological communities, but in Ruby-land they are the orthodoxy.

I've long had a particular fondness for the Ruby community, so I turned up as an attendee at this year's RailsConf.

COM, THEMISISSUGANEWS.

Chad shares my name but I don't share his ukulele skills.

I've long had a particular fondness for the Ruby community, so I turned up as an attendee at this year's RailsConf.

This year my sense is that this morphed into something much more important.

Unlike previous platforms, this one isn't controlled or even dominated by vendors.

Indeed the overwhelming impression I got at RailsConf was a sense of industry-changing mission.

Throughout the conference there was a sense that we are at an inflection-point in our industry, a key technological shift that promotes a new major platform.

Ruby is a community effort.

It was good to see notable Microsoft-oriented geeks Scott Hanselman and Chris Sells at the show, even if when I saw Chris Sells it felt like being in an arena.

CA IS STRICTLY PROHIBITED WITHOUT THE PRIOR WRITTEN PERMISSION OF METROLAND MEDIA GROUP LTD.

It's helped by the fact that the ruby community has formed around the best ideas of the OO and Extreme Programming communities.

Both the ruby lists and particularly the rails lists had tended more towards the sad Internet mean.

Success is not just being an outbreak of sanity in the IT world, but actually leading that world.

COM, THEMISISSUGANEWS.

Talking to people at RailsConf I got the message that that had changed for the worse.

Indeed the overwhelming impression I got at RailsConf was a sense of industry-changing mission.

What pleased me was, that starting with Chad, there was a strong push from the ruby leadership to try and change this.

There seems an excellent chance that Ruby and Rails could become a significant platform for IT develop over the next few years.

Chad shares my name but I don't share his ukulele skills.

Chad Fowler and Rich Kilmer introduced the conference.

COM, THEMISISSUGANEWS.

Corporate IT is dominated by bloatware.

The important thing is that there's a lot of respect and collaboration across this generation gap.

With a young technology there's lots of new and important pieces appearing, but for me the most important of these is JRuby.

A particularly fascinating thing about the Ruby community is the diversity of ages of people in it.

CA IS STRICTLY PROHIBITED WITHOUT THE PRIOR WRITTEN PERMISSION OF METROLAND MEDIA GROUP LTD.

A couple of years ago I wrote about the impressions people had that the RubyPeople were notably more friendly than most software communities.

Ruby is a community effort.

A couple of years ago I wrote about the impressions people had that the RubyPeople were notably more friendly than most software communities.

Not that all is good, however.

With a young technology there's lots of new and important pieces appearing, but for me the most important of these is JRuby.

Throughout the conference there was a sense that we are at an inflection-point in our industry, a key technological shift that promotes a new major platform.

My iconic image was DHH as Neo of the Matrix, breaking the rules of enterprise software and reveling in the success.

Indeed the overwhelming impression I got at RailsConf was a sense of industry-changing mission.

There is a marked lack of women in the ruby community which, apart from the fact

that we're missing out on some serious talent, probably is a sign of other problems within the community.

Both the ruby lists and particularly the rails lists had tended more towards the sad Internet mean.

Our RubyWorks stack tries to simplify this, but JRuby offers the choice of just deploying into a Java container, turning a Rails app into an easily deployed war file.

These ideas have made a great impact on many other technological communities, but in Ruby-land they are the orthodoxy.

I've long had a particular fondness for the Ruby community, so I turned up as an attendee at this year's RailsConf.

Success is not just being an outbreak of sanity in the IT world, but actually leading that world.

Not just do you have the young paradigm breakers like DHH and the core team, you also have the, ahem, rather more seasoned campaigners like PragDave and the RubyCentral triumvirate.

Our RubyWorks stack tries to simplify this, but JRuby offers the choice of just deploying into a Java container, turning a Rails app into an easily deployed war file.

It was good to see notable Microsoft-oriented geeks Scott Hanselman and Chris Sells at the show, even if when I saw Chris Sells it felt like being in an arena. There is a marked lack of women in the ruby community which, apart from the fact that we're missing out on some serious talent, probably is a sign of other problems within the community.

Now in its final cycle of release candidates, JRuby offers a full implementation of the Ruby Platform on the Java JVM, as well as providing a scripting language for the JVM.
