Please complete one of the following projects. Kindly include a brief note explaining your project and why you chose that particular one. Please submit all files in PDF or JPG format.

Designing with code #1
Create a one page site layout promoting yourself. Must include the following:
- HTML5 compliant
- CSS
- Navigation
- Images of your work
- JS functionality is optional, but will get you bonus points!

Please submit all files via static HTML, CSS and image files, Github or Mercurial

Flat Design #2
Create 5 fully designed pages for a promotional website for ONE of the following site types:
- Green Energy Services
- Local Food Focused Restaurant
- Bike Shop

Here are some ideas on the 5 pages you could design:
1) Homepage
2) About page
3) Upcoming Events
4) Blog
5) Services page
6) Image gallery
7) Contact page
